

CMS - Upload Source Code for viewing in CAST Dashboard

Upload Source Code for viewing in CAST Dashboard

This option forces the CAST Management Studio to make source code for analyzed projects available for viewing in the **CAST Dashboard**.

Once the option has been executed, the source code will be visible in the CAST Dashboard and the Discovery Portal via the **Violation Viewer** - see the relevant user guides for more information about this. The purpose is to make sure that each portal (CAST Engineering Dashboard/CAST Discovery Portal) will display the most up-to-date information about the source code as possible.

You can access the option from various locations:

- In the [Services view](#) by right clicking the **Analysis Service**
- In the [Analysis Service editor](#) by selecting the option:

Please note that if the **Always upload source code for viewing in CAST Dashboard** option (see [Common Technology options](#)) is checked, the CAST Management Studio will always make source code available in the CAST Engineering Dashboard and the Discovery Portal via the **Violation Viewer** when you [generate a snapshot](#) and it will not be necessary to manually use the **Upload Source Code for viewing in CAST Dashboard** option.
