i Summary: this page describes the new features and bugs that have been fixed in the CAST Security Dashboard 1.8.1.

Content matrix

Version	Summary of content
1.8.1	<ul style="list-style-type: none">• Minor tile update

Updates

SECJAVA-90 - Existing GDPR tile renamed DATA SAFETY

The default tile **GDPR** has been renamed and now uses a different tag:

Old Name	Old Tag	New Name	New Tag
GDPR	AIP-GDPR	DATA SAFETY	DATA-SAFETY

The behaviour of the tile has not changed - i.e. the tile displays the number of **Violations** or **Critical Violations** in the Application for rules that have the **selected tag** (i.e. DATA-SAFETY). Clicking on this tile navigates to the **Risk investigation view** with the **specific tag selected** at the top of the table. "All Rules" will be selected in the Technical Criteria table and the list of rules displayed will all be tagged with the selected tag:

Click to enlarge

The screenshot shows the 'All Rules...' view in the CAST Security Dashboard. The 'Technical Criteria' table on the left has 'All Rules...' selected. The 'Rules...' table on the right shows a list of rules, with the 'DATA-SAFETY' tag selected in the filter dropdown. A red arrow points from the 'All Rules...' selection in the Technical Criteria table to the 'DATA-SAFETY' dropdown in the Rules table.

TECHNICAL CRITERION	NAME
All Rules...	CWE-614: Sensitive cookie in HTTPS session without 'Secure' attribute
Secure Coding - Input Validation	
Programming Practices - Error and Exception Handling
